We Care, We Serve
Subang Jaya Medical Centre

Subang Jaya Medical Centre

No 1, Jalan SS 12/1A, 47500 Subang Jaya,
Selangor Darul Ehsan, Malaysia.
Tel : (+603) 5634 1212
Fax : (+603) 5630 6075
Web-site: www.simenet.com/sjmc/

For one of the most innovative and advanced hospital facilities, with world class medical expertise and medicine topped by excellence in quality service, Subang Jaya Medical Centre has in the past 20 years, built its reputation as an internationally accredited tertiary care medical centre — one that strives to continuously achieve the highest standard of service.

Dedicated to high patient satisfaction, excellent medical outcomes and continuous performance activities, the following full accreditation obtained to-date bear testimony to SJMC's quest for excellence: ISO 9001:2000, OHSAS 18001:1999 and Malaysian Hospital Accreditation Standards.

Located within the township of Subang Jaya, SJMC is half an hour's drive from the Kuala Lumpur International Airport as well as the city centre and is easily accessible via major highway links, making it the ideal treatment location for both local and foreign patients. Functioning as an international referral centre, it is equipped to handle a multiplicity of simple to complex medical and surgical procedures, ranging from endoscopic procedures to liver transplants.

Over 2 decades, SJMC's accomplishments and its dedication to excellence have seen it rise to become one of the region's premier medical centres, with a reputation matched by a steady growth in its patient volume. Today, the 375-bed hospital sees over 1500 outpatients and more than 150 admissions daily. Both SJMC's surgical and medical disciplines are supported by extensive and highly advanced diagnostic and therapeutic resources. Among these resources are various centres at SJMC that provide specialized medical and healthcare facilities and services in a number of disciplines.

The Cancer & Radiosurgery Centre was opened in 2002 with great anticipation as it was purpose built and developed to serve as a regional referral centre for cancer treatment. SJMC was the first hospital in the Southeast Asian region to install and use the powerful BrainSCAN computer planning software and BrainLAB's micro-Multileaf Collimator fully integrated with the Varian linear accelerator for precise dynamic conformal arc stereotactic radiotherapy and stereotactic radiosurgery. In addition, with Varian's 120-Multileaf Collimator, 3-D Conformal Radiation Therapy is routinely performed. Other enhanced technologies such as Intensity Modulated Radiotherapy and Image-Guided Radiotherapy (IGRT) will be introduced in the near future. SJMC is also the

first private hospital in the country to offer Total Body Irradiation for both paediatric and adult patients undergoing bone marrow or stem cell transplant.

SJMC will see further growth with the opening of its Nuclear Medicine & PET/CT Centre in 2005. Other advanced and dedicated facilities at SJMC are the Heart Centre, Vascular & Interventional Radiology Centre, Blood Diseases Centre, Endoscopy Daycare Unit, Subang Fertility Centre, Cytogenetics Lab, Stone Centre, and Health Screening Centre.

In the last 20 years, SJMC has achieved many significant milestones, scored many firsts and won numerous awards for quality. Among these were the International Asia Pacific Quality Award 2000 and the Prime Minister Quality Award for the Private Sector in 1998 and 2003. Such recognition affirms its commitment in continuing to provide the highest standard of quality medical care.

At SJMC - 'We Care. We Serve.'
